Introduction

The **chpIENCLOSE**'s completely flush design can be at full height or kept short of the ceiling. Door hardware is fully concealed and installed in the thickness of the material, while dividers are back-fastened to maintain a continuous sightline. Supporting legs conveniently accommodate two different heights to meet ADA requirements. Additionally, the top fascia that conceals the stabilizing profile has the option of a LED indicator light showing occupancy. The chpIENCLOSE balances a minimal, easy-to-install design with superior engineering to accommodate large tolerances.

THIS SPACE FEATURES:

- A** chpIENCLOSE
- B** solidSINK > Integra
- C** glassMIRRORS > LED

CREATE WITH CARVART

Extend hospitality through elegant and enduring design.

Features + Benefits

Design + Durability

CARVART chPIENCLOSE offers sleek European-styled bathroom cubicles - a completely flush exterior with concealed mounting and fasteners. All hardware components are sleek, minimalistic, and designed to coordinate beautifully with the chPL enclosures. Multiple configurations and a wide range of accessories make specifying efficient and easy and enable a large degree of customization while still focusing on repetitive, optimized manufacturing processes for quality and budget control. CARVART's compact high pressure laminate comes in a wide range of finishes and colors that can be customized to achieve almost any look.

Hygiene + Maintenance

Flush, chPL surfaces enable easy cleaning and reduced collection of dirt and bacteria. High-quality, double-anodized aluminum hardware performs resplendently in wet environments, will not degrade over time, and makes systems inherently low-maintenance. The system offers optional nano-technological treatment to resist fingerprints and repel pollutants and is easily washable to support a hygienic environment.

Easy Installation

Designed with installation in mind, chPIENCLOSE components are ergonomic, lightweight, and easy to sequence and adjust. Connections and mounting details are made to accommodate field conditions and maintain a large range of flexibility and tolerance. Clear, graphic install instructions allow labor time and cost to be kept to a minimum.

COMPONENTS

NOTE: Letters correspond to components labeled on the 'TYPICAL COMPONENTS' diagram.

A. Door

Material: cHPL

- 9/16" Compact High Pressure Laminate
- Specify Color & Pattern

A-1 Gravity Butt Hinge

A-2 Pull Options

- Round Pull
- Rectangle Pull
- ADA Rectangle Pull
- Ladder Pull
- Back to Back Ladder Pull

A-3 Lever Latch

A-4 Fixed Transom

B. Fixed Pilaster Panel

Material: cHPL

- 9/16" Compact High Pressure Laminate
- Specify Color & Pattern

B-1 Back Fastened Support Leg - Clearance Options:

- 3" Floor Clearance
- 9" Floor Clearance
- 12" Floor Clearance

B-2 Rabbeted Door Jamb with Bulb Gasket

C. Divider

Material: cHPL

- 9/16" Compact High Pressure Laminate
- Specify Color & Pattern

C-1 Full Height Vertical Profile

C-2 Clamp Support Leg - Clearance Options:

- 3" Floor Clearance
- 9" Floor Clearance
- 12" Floor Clearance

C-3 T-Connection (to Fixed Pilaster Panel)

D. Stabilizing Header

Material: Double Anodized Aluminum

- Standard Finish: Satin Anodized Aluminum
- Specify Color & Pattern

D-1 Wall Mounted Stabilizing Connection

D-2 LED Privacy Indicator (Optional)

HARDWARE MATERIAL

Material: Double Anodized Aluminum
 Standard Finish: Satin Anodized Aluminum
 Additional Finishes: Titanium, Any RAL Color
 Additional Hardware Finishes Refer to CARVART Material Guide

ACCESSORIES

- Coat Hook
 - Coat Hook | Door Bumper: 3" or 6" Option
 - Pre-Approved 3rd Party Accessories
 - 3rd Party Accessories Approved upon Completed Testing
- See Individual Specification Sheets for Further Details

HEIGHTS & WIDTHS

- Max Height
1. Floor to Top of Header = 108"

Reference Dimensioned Plan, Section, and Elevation Provided
 Contact CARVART Sales Team for Non-Standard Sizes.

- Widths
1. Fixed Divider, Max 64-7/8"
 2. Doors, Max 42"

ACCESSIBILITY CONFIGURATIONS

- Pre Sized System Clearances for Accessibility Requirements
- Ambulatory
 - Full ADA
- Consult local code and building requirements for final design basis.

INSTALLATION NOTES

- cHPL panels come cut to size based on field dimensions and shop drawings. Client-supplied anchors and fasteners. Requires trained and competent glazing or carpenter industry professionals. Installation instructions, assistance and training available at time of order.
- Final anchoring means and methods are client directed or based on installers intent. Mounting fasteners and anchors to be supplied by others.
- Linear foot weights available and based on final design.
- CARVART advisory available.
