CARVART (CARVE-art) reflects back to its 20-year-old beginning in Brooklyn, NY when the art of carving glass not only inspired its name it also produced beautiful glass products. Today CARVART’s rich past links to a clear future with the refined and sophisticated carved, etch patterns created for our first C1 Collection. True to the CARVART brand, the twelve designs in the collection incorporate squares and triangles made up of organic hand-painted shapes and crisp geometric lines. The organic geometry of these curated patterns propels a dynamic flow for any design application. But this is only the beginning—express yourself creatively by adding color, varying translucent views and pattern scale to any of these twelve exclusive etched designs. Create with CARVART.
Organic Geometry
12 Etch Patterns
Each pattern is available in a small (S) and a 200% larger (L) scale.

Scales shown are not actual size.

Redhook, Seagate, Midwood, Kensington and Wingate offer standard reverse choices (R).

Bayridge and Canarsie are double sided.

Scaling

Collaborate with CARVART to customize a pattern scale according to your personal preference and design vision.

01LR (Custom)
Banding

Tailor a pattern to enhance the functional aesthetic of the partition while creating a unique design expression.

01LR (Custom)
CARVART was brought in by developers of 261 Madison Avenue located in NYC, with the idea to produce a custom etched product for the exterior facade. The finished product was a unique custom insulated unit made by layering the custom infinity etched pattern on the front, while employing CARVART’s pure shimmer laminated product on the back. It features a unique shadow 3D pattern effect, ever changing depending on the location of the sun.
