Commercial Bath
> Lockers
CARVART’s glassLOCKERS and chpLOCKERS come in a wide range of configurations to meet almost any facility’s needs. The Compact High Pressure Phenolic Laminate (cHPL) body provides durability, while the 1/4” thick glass (or cHPL, optional) doors have the flexibility of opening up to 180 degrees. Anodized aluminum hinges are self-lubricating. Additionally, built-in slits ensure airflow for proper ventilation or drainage. Throughout the length of each door, profiles are equipped with rubber gaskets, acting as shock absorbers. With a large selection of colors, finishes, and configurations, CARVART’s locker offering is perfect for virtually any setting.
Types

**glassLOCKERS**  
(GBOX-T)

Built with a 1/4” glass door, durable cHPL body, anodized aluminum profiles, and self-lubricating hinges, CARVART’s glassLOCKERS ensure a balance between durability and design. Door numbering is laser printed on stainless steel plates or, on special order, printed/etched directly onto the glass doors.

**chplLOCKERS**  
(SBOX-T)

Available configurations are flexible, as they include single-, double- and triple-wide groupings, in conjunction with 1, 2, 3 and 4 tier options. Linear slits can be added to the bodies of the lockers to facilitate internal ventilation. Standard lockers include an adjustable base consisting of leveler legs, as well as an optional cHPL base.

Compact High Pressure Phenolic Laminate (cHPL) lockers with cHPL fronts are available in a wide range of configurations, wood grains and colors to accommodate almost any customer’s needs. The system’s panels and doors are scratch-resistant, with smoothed edges and rounded angles.

Designed to optimize space and organization, options include a choice of flat or sloping hood, as well as incorporating clean/dirty compartments. Additionally, linear slits can be added to the bodies of the lockers to facilitate internal ventilation and drainage.
Features and Benefits

**EASE OF INSTALLATION**
CARVART by Soema products are not only engineered with designers and facility managers in mind, they equally accommodate installer to ensure products are easy to install. Clear, graphic install instructions allow labor time and cost to be kept to a minimum. All locker components come with pre-machined holes for fasteners and extrusions. Doors come with fully adjustable hinges integrated into the vertical profiles. The bodies are composed of CHPL material which is durable yet lightweight, making them easy to handle.

**HYGIENE AND MAINTENANCE**
CARVART’s chplLOCKERS and glassLOCKERS are made of inherently hygienic materials that are non-porous and, therefore, rarely collect bacteria. This makes them ideal for healthcare and gym facilities or any other settings where this could be a concern. High-quality, anodized metal components ensure durability over time with standard maintenance.

**TURNKEY SOLUTION**
CARVART’s comprehensive services include every component needed to design and manage a full project from design development and guidance to post-installation services and support. Architects can work closely with CARVART designers to select appropriate and stunning glass products; shop drawings and full coordination services are available through the dedicated project manager; a full range of hardware and glass options are available to suit any project; post-delivery services include a wide range installation guidance and training.
Configurations

**CONFIGURATION IN COLUMNS**

A series of lockers can consist of an “unlimited” number of columns. The total length of a series of lockers is given by the sum of the width of each column plus 7/16” to be added at the beginning and at the end of the series.

**LOCKER SUPPORTS**

The different combinations of lockers can be supplied either with no support at all or standing on:
- 2-3/8” legs (standard)
- 3-15/16” legs
- 7-7/8” legs
- 15-3/4” bench
Configurations

**TYPE A**
Single-tier locker with clean/dirty compartments. Fitted out with hanging rod and 2 clothes hooks.

Options: Glass and cHPL locks

With a variety of lock options, CARVART offers several solutions to meet aesthetic, function and budget needs. Digital options include keypad and two price points, while the mechanical options are more minimal yet still easy to operate as a user and from a facility manager standpoint.

**NUMBER PLATE OPTIONS**

- Sticker number plate with heavy-duty adhesive (placed at center/top of door or directly above lock (Digitlock option only).
- Number plate integrated in keyed lock option.
Lockers > glassLOCKERS
Specifications

LOCKERS > glassLOCKERS (CODE)
Built with a 1/4” glass door, durable chPLO body, anodized aluminum profiles, and self-lubricating hinges, CARVART’s glassLOCKERS ensure a balance between durability and design. Door numbering is laser printed on stainless steel plates or, on special order, printed/etched directly onto the glass doors. Available configurations are flexible, as they include single-, double- and triple-wide groupings, in conjunction with 1, 2, 3 and 4 tier options. Linear slits can be added to the bodies of the lockers to facilitate internal ventilation. Standard lockers include an adjustable base consisting of leveler legs, as well as an optional chPLO base.

VALUE-ADDED BENEFITS
• Multiple colors and finishes for doors and bodies
• Various lock options
• Durable chPLO material
• Easy to install
• Flexible configurations
• Turnkey project services

FACILITY DESIGN APPLICATIONS
Lockers for athletic, healthcare, corporate facilities.

CONFIGURATIONS
Single-, double- and triple-wide groupings. 1, 2, 3 and 4 tier options.

FUNCTION
Doors open up to 180 degrees. Individual locks per locker compartment.

GLASS TYPES
Tempered monolithic.

GLASS FINISHES — Refer to Finish Chart
CARVART laminated transparent glass design options available.

chPLO FINISHES — Refer to Finish Chart
White (406) for locker body only.

SURFACES
Smooth glass. Etched glass.

GLASS THICKNESS — Refer to local code and structural requirements
Accommodates 1/4” Nominal.

HARDWARE DIMENSIONS
1-5/16” exposed hinge width.

HARDWARE MATERIALS/FINISHES — Refer to Finish Chart
Satin Anodized Aluminum.

WIDTHS (inches):
Base—Shared common Up to 116
2-Unit wide lockers 31-1/2
3-Unit wide lockers 47-1/4
Interior shelves 14-7/8

HEIGHTS (inches): Tall version Short version
Overall 73-1/4 37-3/4
Base 2-3/8 2-3/8
1-Door 70-5/8 35-3/16
2-Door 35-3/16 17-3/4
3-Door 23-9/16 N.A.
4-Door 17-3/4 N.A.

DEPTHS (inches):
Overall 19-13/16
Internal shelves 18

MOUNTING FASTENERS
Cases bolt together through side panels and secure to wall with recommended bracket. Final anchoring decision is client-directed or based on client structural consultant. Mounting fasteners and anchors to be supplied by others. CARVART advisory available.

ADD-ON DESIGN OPTIONS — Per specification and upcharges apply

CUSTOMIZATION
Special sizes or finishes available upon request.

INSTALLATION
Requires trained and competent glazing or carpenter industry professionals. Installation instructions, assistance and training available at time of order.

HARDWARE WARRANTY — 5-year limited warranty.
