glassSTACKWALL
> Frameless
With four unique movable wall products, CARVART offers a broad range of ways to section off a space.

CARVART’s movable wall products, glassSTACKWALL and glassFOLDWALL, (both available in Framed and Frameless) are unique space-dividing solutions designed to custom fit into an opening and operate easily for years to come. All CARVART movable wall products are engineered to install smoothly and efficiently. Each solution is custom dimensioned for each project opening and comes with a wide variety of design options to enable architects to configure the final design to a client’s exact needs and specifications.

Both Framed and Frameless designs have minimized frame detailing that can be combined with thousands of different CARVART glass possibilities, resulting in a tailored appearance in your space, privacy flexibility, acoustical barriers and high-quality performance. This translates into an overall design success that maximizes the visual connection between two adjoining areas.
Specifications

glassSTACKWALL > FRAMELESS (STAK-XF)
Top-hung glass panels that are captured by top and bottom rails and travel individually along a suspended track and stack and store into a designated parking area. Top tracks can be concealed into the ceiling for minimal look with the advantage of glass panels completely disappear from the opening or be left exposed.

CLOSED

PARTIALLY OPEN

OPEN
Details

TYPICAL FRONT ELEVATION

- Option to install above ceiling line for concealed look
- Dust-proof strike, GC to coordinate floor drilling
- Closing pin (lock & non-lock options available)

TYPICAL HORIZONTAL SECTION

- Varies based on panel size

TYPICAL VERTICAL SECTION

- Structural not by Carvart, consult structural engineer for adequate reinforcement
- Finished ceiling by others
- Fasteners by others
- Aluminum extrusion
- Finished ceiling (optional), track can be concealed as shown
- Finished aluminum fascia, various finishes available
- Carvart glass, consult sales & design team for options
- Dust-proof strike, GC to coordinate floor drilling
- Max 46"
Options: Parking area configurations

**PG-01**
TYPICAL PARKING AREA

**PG-02**
PARKING W/ CONCEALED CORNER

**PG-03**
PARKING AREA (WIDE OPENING)

**PG-04**
PARKING W/ CORNER
(VARIED PANEL SIZE OPTION AVAILABLE)

**PG-05**
PARALLEL PARKING

**PG-06**
PARKING W/ CONCEALED CORNER AND PARALLEL OPTION
Options: Panel types

- **Stacking Panel**
- **Swing Panel** (at parking area)
- **Mid-run door panel** (integrated hydraulic closer in header)
- **Fixed swing panel** (end panel only; does not stack)
- **Fixed panel**

GLASS WALLS > MOBILE > glass STACK WALL > FRAMELESS
Options: Panel headers

Typical Panel Section

- FINISHED CEILING BY OTHERS
- ALUMINUM EXTRUSION
- FINISHED ALUMINUM FASCIA
- CARVART GLASS, CONSULT SALES & DESIGN
- SUB FLOOR IF APPLICABLE

Mid-Run Pivot Door Panel Section

- FINISHED CEILING BY OTHERS
- HYDRAULIC CLOSER
- ALUMINUM FINISH FASCIA
- CARVART GLASS

Dimensions:
- 2 3/4" [70]
- 7/8" [22]

Options: Connections

Depending on the desired level of acoustic privacy, CARVART offers a range of seals and connection options.
Design appeal and detailing

- All finish profiles and hardware are specifically engineered to keep sight-lines and design aesthetic minimal
- Aluminum fascia’s conceal all clamping and hardware, available in various finishes
- Lightweight and optimized hardware solutions keep system efficient and easy to operate
- Create unique appearance with CARVART glass options
Ease of Installation

**Simple Panel Assembly**
All hardware components come individually packed per panel and come with individual panel assembly instructions that are labeled to match the shop drawings for easy set up and assembly.

**Pre-Assembled Components**
Easy-to-install top track: parking areas, removable maintenance piece and lengths of top track come pre-cut and assembled making it easy and fast to install.

**Self-Guided Hardware**
All hardware is self-guided to prevent any incorrect installation or operation.
Life cycle maintenance

**LOW LABOR COST**
Conventional systems have much higher labor costs due to complex installation methods. CARVART glassRAILING products are designed to be light-weight and ergonomic to facilitate easy installation.

**EASY TO REPLACE**
Intermediate panels are removable and replaceable due to dry-glazed system.

**DURABILITY AND HIGH CYCLE TESTING**
All CARVART movable walls are cycled-tested to hundreds of thousands of cycles and rated for weights far beyond the maximum panel size.

**CLEANING AND MAINTENANCE**
Virtually no maintenance outside of cleaning once the system is in place and installed. Profiles have minimum reveals and crevices to collect dirt and grime.
**Project management coordination**

**COORDINATION AND SHOP DRAWINGS**
- CARVART offers full scheduling coordination and phasing for custom project delivery
- Full range of coordination and shop drawing/engineering services
- Dedicated project managers are assigned to each project for maximum success

**HARDWARE OPTIONS**
- Provide full range of hardware options for infinite design and site conditions
- Multiple design options

**GLASS DESIGN AND DEVELOPMENT**
- Glass design and development services integrate standard and custom glass selections with available hardware options

**POST-DELIVERY SERVICES**
- Installation training that is specific to project and product
- Project-specific service levels (including phased deliveries and shipping)
- Project logistics can ship by floor or designated area
